# Streamlining Student's Access to Important Administrative Areas....

## Meet  FrontDesk

FrontDesk is a hardware and software queueing solution to help students complete important administrative tasks, without having to wait in lines all day, only to be sent to another department, to wait in another line.

The system allows for self-service kiosks, online reservations and check-in, real-time wait information and priority fast-tracking if you need to switch departments.

The FrontDesk system will be used in areas where lineups are common, and is intended to reduce the time standing in line.

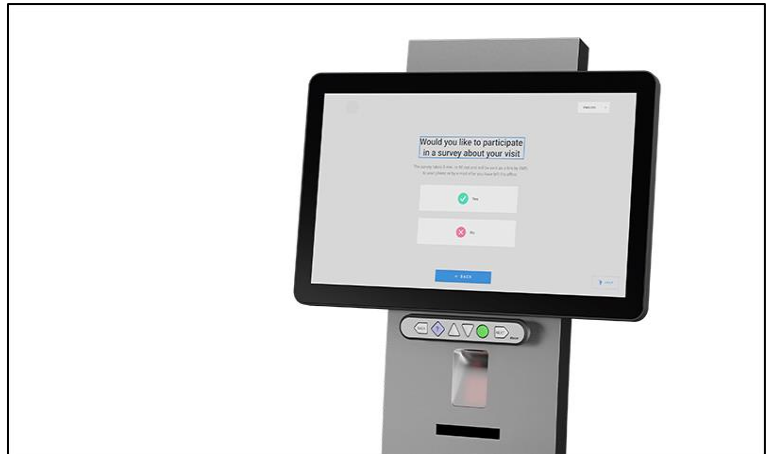

The kiosks will be available in various locations around campus for self-service as well as large displays so you can track your status. You can even check-in, make, change or cancel your reservation from your smartphone.
