

Welcome to the Dell XPS 13 2-in-1 Laptop

For the Staff computer upgrades this year, we moved from the Latitude 7300-series 2-in-1s to the XPS 13.

This new model offers some powerful hardware in a sleek modern package.

The Outside

The new shell comes in a shiny metallic case. It has a large, high-definition display. On the top you will find the volume buttons (1), NFC wireless charging connection for the stylus (2) and the power button (3). On the

left side, you will find 2 USBc ports (5) and a speaker grill (6). On the right side you will find another speaker grill for stereo audio output.

The bottom of the system has the Pogo pins for connection to the folio case.

Accessories

The XPS comes with a Bluetooth Stylus, which magnetically “docks” on the top edge of the system. This also charges the pen.

The Folio case also attaches to the XPS magnetically, and provides a soft-touch keyboard and trackpad. The back of the folio case can be adjust to several positions to give the desired angle.

The XPS also comes with a USBc to USBa adapter for use with other external devices like a mouse.

You will also receive a USBc to 3.5mm to use with headphones (if you do not have BT headphones available)
